

THE ORPHAN ONCOLOGY INNOVATOR

PRESS RELEASE

## ***Onxeo to Present at BIO International Convention in Boston***

**Paris (France), May 23, 2018 – 05:45 pm CEST – Onxeo S.A.** (Euronext Paris, NASDAQ Copenhagen: ONXEO FR0010095596), a biotechnology company specializing in the development of innovative drugs in oncology, notably against rare or resistant forms of cancer, today announced that Judith Greciet, the Company's Chief Executive Officer, will present at the 25<sup>th</sup> BIO International Convention. The conference is being held on June 4-7, 2018, in Boston, MA.

The BIO International Convention is hosted by the Biotechnology Innovation Organization (BIO). It is attended by more than 1,100 biotechnology and pharmaceutical companies, academic institutions, state biotechnology centers and related organizations across the United States and from over 30 countries worldwide.

### **Onxeo corporate presentation:**

Date: June 4<sup>th</sup>, 2018

Time: 3 pm EST / 9 pm CEST

Location: Theater 2 - Boston Convention & Exhibition Center: 415 Summer St., Boston, MA

### **UPCOMING FINANCIAL PUBLICATIONS & EVENTS**

- **Shareholder's general meeting on the second call:** Tuesday, June 19, 2018
- **Half-year 2018 results:** Friday, July 27, 2018

### **About Onxeo**

Onxeo (Euronext Paris, NASDAQ Copenhagen: ONXEO) is a French biotechnology company developing innovative oncology drugs based on DNA-targeting and epigenetics, two of the most sought-after mechanisms of action in cancer treatment today. The Company is focused on bringing early-stage first-in-class or disruptive compounds (proprietary, acquired or in-licensed) from translational research to clinical proof-of-concept, a value-creating inflection point appealing to potential partners.

Onxeo's R&D pipeline includes **belinostat**, an HDAC inhibitor (epigenetics) currently being developed in oral form to be used in combination with other anti-cancer agents for liquid or solid tumors. Belinostat is already conditionally FDA-approved in the US as a 2<sup>nd</sup> line treatment for patients with peripheral T cell lymphoma and marketed in the US by Onxeo's partner, Spectrum Pharmaceuticals, under the name Beleodaq® (belinostat IV form).

Onxeo is also developing **AsiDNA™**, a first-in-class DNA break repair inhibitor based on a unique decoy mechanism. AsiDNA™ has already successfully completed a Phase I trial in metastatic melanoma via local administration, and is currently being developed for systemic (IV) administration in solid tumors.

AsiDNA™ is the first compound generated from **platON™**, the Company's proprietary chemistry platform of decoy oligonucleotides based on three components, a sequence of double strand oligonucleotides, a linker and a cellular uptake facilitator. PlatON™ will continue to generate new compounds that will broaden Onxeo's pipeline.
