

THE ORPHAN ONCOLOGY INNOVATOR

PRESS RELEASE

## ***Combined General Meeting on May 16, 2018***

**Paris, April 25, 2018 – 6:30 pm CEST – Onxeo S.A.** (Euronext Paris, NASDAQ Copenhagen: ONXEO FR0010095596), a biotechnology company specializing in the development of innovative drugs in oncology, in particular against rare or resistant cancers, today announced that the Onxeo shareholders are invited to attend the Company's Combined Ordinary and Extraordinary General Meeting which will be held on Wednesday, May 16, 2018 at 10:00 am CEST at the Onxeo head office at 49 Boulevard du Général Martial Valin, 75015 Paris, France.

The official notice of the General Meeting was published in the French Republic's Bulletin des Annonces Légales Obligatoires (i.e. the "Bulletin of Mandatory Legal Announcements") on April 11, 2018 and includes the agenda, the draft resolutions, and information on attendance and voting procedures. Under the conditions set out by the current legislation, you can find the full notice, together with all other related documents, on the Onxeo website: <http://www.onxeo.com/en/investisseurs/assemblee-generale/>

The related documents are available to shareholders at the company's head office and on the Company's website. Shareholders may request to receive the documents by sending their request by post to Onxeo (Direction Financière – 49 boulevard du Général Martial Valin, 75015 Paris, France), or email ([investors@onxeo.com](mailto:investors@onxeo.com)).

### **About Onxeo**

Onxeo (Euronext Paris, NASDAQ Copenhagen: ONXEO) is a French biotechnology company developing innovative oncology drugs based on DNA-targeting and epigenetics, two of the most sought-after mechanisms of action in cancer treatment today. The Company is focused on bringing early-stage first-in-class or disruptive compounds (proprietary, acquired or in-licensed) from translational research to clinical proof-of-concept, a value-creating inflection point appealing to potential partners.

Onxeo's R&D pipeline includes **belinostat**, an HDAC inhibitor (epigenetics) currently being developed in oral form to be used in combination with other anti-cancer agents for liquid or solid tumors. Belinostat is already conditionally FDA-approved in the US as a 2<sup>nd</sup> line treatment for patients with peripheral T cell lymphoma and marketed in the US by Onxeo's partner, Spectrum Pharmaceuticals, under the name Beleodaq® (belinostat IV form).

Onxeo is also developing **AsiDNA™**, a first-in-class DNA break repair inhibitor based on a unique decoy mechanism. AsiDNA™ has already successfully completed a Phase I trial in metastatic melanoma via local administration, and is currently being developed for systemic (IV) administration in solid tumors.

AsiDNA™ is the first compound generated from **platON™**, the Company's proprietary chemistry platform of decoy oligonucleotides based on three components, a sequence of double strand oligonucleotides, a linker and a cellular uptake facilitator. PlatON™ will continue to generate new compounds that will broaden Onxeo's pipeline.
