

Onxeo to attend the European Healthcare Conference organized by Bryan, Garnier & Co.

Paris (France), November 5, 2019 – 5:45 pm CET – Onxeo S.A. (Euronext Paris, NASDAQ Copenhagen: ONXEO), (“Onxeo” or “the Company”), a clinical-stage biotechnology company specializing in the development of innovative drugs targeting tumor DNA Damage Response (DDR) in oncology, in particular against rare or resistant cancers, today announced its participation in the European Healthcare Conference held by the investment bank Bryan, Garnier & Co. on November 12-13, 2019, in Paris, France.

Judith Greciet, CEO, and Nicolas Fellmann, CFO of Onxeo, will present the Company at meetings with international investors on Tuesday, November 12, 2019.

Upcoming events

▪ November 6, 2019	Évènement Direct Dirigeants	Paris, France
▪ November 12-13, 2019	Bryan, Garnier & Co European Healthcare Conference	Paris, France
▪ November 12-15, 2019	Tides Europe 2019	Amsterdam, Holland
▪ January 29-31, 2020	PARP & DDR inhibitors Summit 2020	Boston, MA, USA
▪ March 2-4, 2020	TAT 2020 International Congress on Targeted Anticancer Therapies	Paris, France
▪ March 30-April 1, 2020	DNA Damage Responses and Cancer	Cambridge, UK
▪ April 24-29, 2020	AACR Annual Meeting 2020	San Diego, CA, US

About Onxeo

Onxeo (Euronext Paris, NASDAQ Copenhagen: ONXEO) is a clinical-stage biotechnology company developing innovative oncology drugs targeting tumor DNA-binding functions through unique mechanisms of action in the sought-after field of DNA Damage Response (DDR). The Company is focused on bringing early-stage first-in-class or disruptive compounds from translational research to clinical proof-of-concept, a value-creating inflection point appealing to potential partners.

platON™ is Onxeo’s proprietary chemistry platform of oligonucleotides acting as decoy agonists, which generates new innovative compounds and broaden the Company’s product pipeline.

AsiDNA™, the first compound from platON™, is a first-in-class, highly differentiated DNA Damage Response (DDR) inhibitor based on a decoy and agonist mechanism acting upstream of multiple DDR pathways. Translational research has highlighted the distinctive properties of AsiDNA™, notably its ability to abrogate tumor resistance to PARP inhibitors regardless of the genetic mutation status. AsiDNA™ has also shown a strong synergy with other tumor DNA-damaging agents such as chemotherapy and PARP inhibitors. The DRIIV-1 (DNA Repair Inhibitor-administered IntraVenously) phase I study has evaluated AsiDNA™ by systemic administration (IV) in advanced solid tumors and confirmed the active doses as well as a favorable human safety profile. The ongoing DRIIV-1b extension study is assessing the safety and efficacy of a 600 mg dose of AsiDNA™ in combination with carboplatin and then with carboplatin and paclitaxel, in patients with solid tumors who are eligible for such treatments.

OX401 is a new drug candidate from platON™, optimized to be a next-generation PARP inhibitor acting on both the DNA Damage Response and the activation of immune response, without inducing resistance. OX401 is undergoing preclinical proof-of-concept studies, alone and in combination with immunotherapies.

Onxeo's portfolio also includes **belinostat**, an HDAC inhibitor (epigenetics). Belinostat is already conditionally FDA-approved in the US as a 2nd line treatment for patients with peripheral T cell lymphoma and marketed in the US under the name Beleodaq® (belinostat IV form).
